

USAID
FROM THE AMERICAN PEOPLE

SUSTAINABLE HIGH IMPACT INFRASTRUCTURE FOR EDUCATION AND AGRICULTURE ACTIVITY(SHINE)

FEBRUARY 2017 – FEBRUARY 2020 | IMPLEMENTER: JLN-B360 JOINT VENTURES

The Sustainable High Impact Infrastructure for Education and Agriculture (SHINE) activity provides building construction services in support of the USAID funded projects in agriculture, higher education, economic growth, governance and natural resource management. Key to the implementation of this program is close coordination with relevant respective Government of Liberia (GOL) agencies.

Current Activities

- Routine maintenance of buildings constructed under the SHINE activity

Accomplishment to Date

- Renovated the University of Liberia Engineering Building, Fendall Campus, Margibi County
- Completed the expansion /renovation of the Cuttington University Library, Bong County.
- Completed the construction of 5 new staff housing at Cuttington University, Bong County.
- Completed the construction of three Community Colleges Annexes (classrooms and laboratories) in Grand Bassa, Nimba and Lofa Counties.

Planned Outcomes

- Once the new construction/renovation is complete, the SHINE Project intervention in support of agriculture, higher education, economic governance and natural resources in Liberia will be achieved.
